

AVAMORE HS SERIES

PROFILE CUT HEAT SEALERS

AVAMORE manual heat sealers are ideal for the larger kitchen, preparation rooms and sandwich shops. With a choice of two models, with standard sandwich wedge platens and custom design platen sets to meet your requirements.

Quick and Easy to use

These manually operated profile cut heat sealers can seal and trim the film of up to 30 packs per minute depending on platen size and layout.

Sealing Area

The model HS30 has a maximum sealing area of 200mm x 300mm any shape within that area can be accommodated.

The model HS31 has a maximum sealing area of 265mm x 310mm any shape within that area can be accommodated and offers capacity for a wider range of packaging sizes.

Temperature Control

For ease of use there is a digital control temperature control allowing for infinite range of between 100° and 200°C, it will weld seal the latest laminate and microwavable packaging.

Hygienic Construction

The heater plate, heater cover and other components around the sealing area are manufactured in stainless steel or aluminium.

Simple to Install

There is no installation, just a suitable hygienic worktop or table top with a 13A socket within 2 metres.

Safety

Fitted with an over temperature thermostat which will cut off the heater automatically. An interlock system prevents the blade being lowered on a misaligned lower platen and there is effective guarding.

Models

HS30 manually operated bench model.

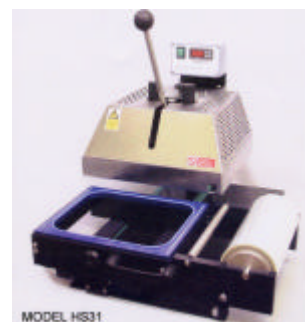

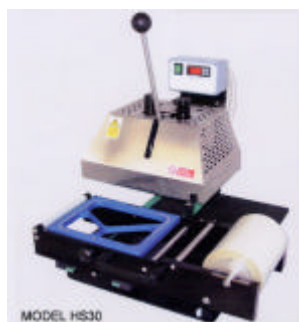

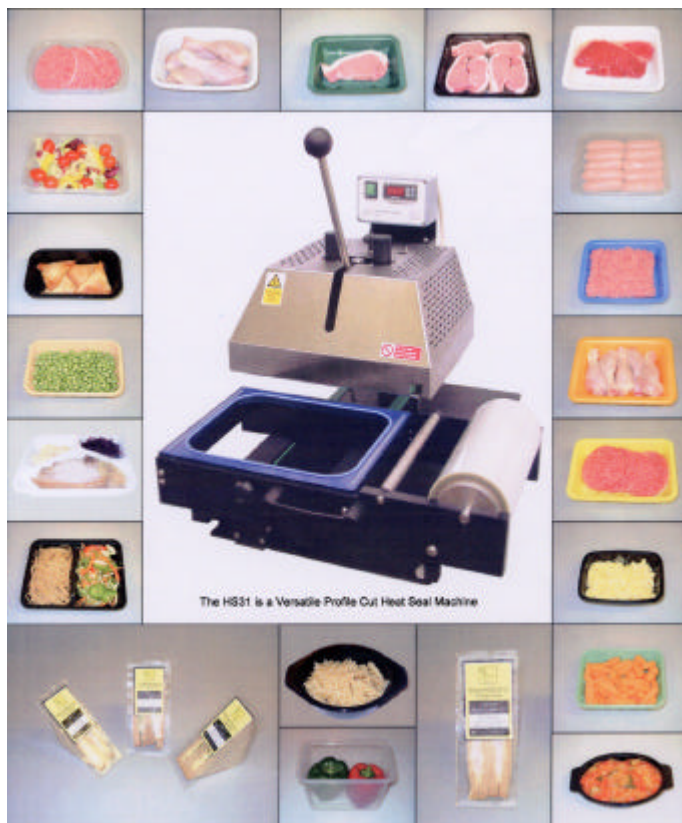

HS31 manually operated bench model.

Optional Accessories

Platens to suit all food products and sandwich sizes.
